

Installing Railo on Mac OSX

Setup

Tomcat Administrator Username 

Tomcat includes a web interface that can be used to manage some aspects of your Tomcat server. Please enter the username that you would like to use to access that web based administrator.

Tomcat Administrator Username

Setup

Administrator Password 

Now I need a password for the Tomcat Administrator...

Administrator Password

Retype Password

BitRock Installer

Setup

Tomcat Port

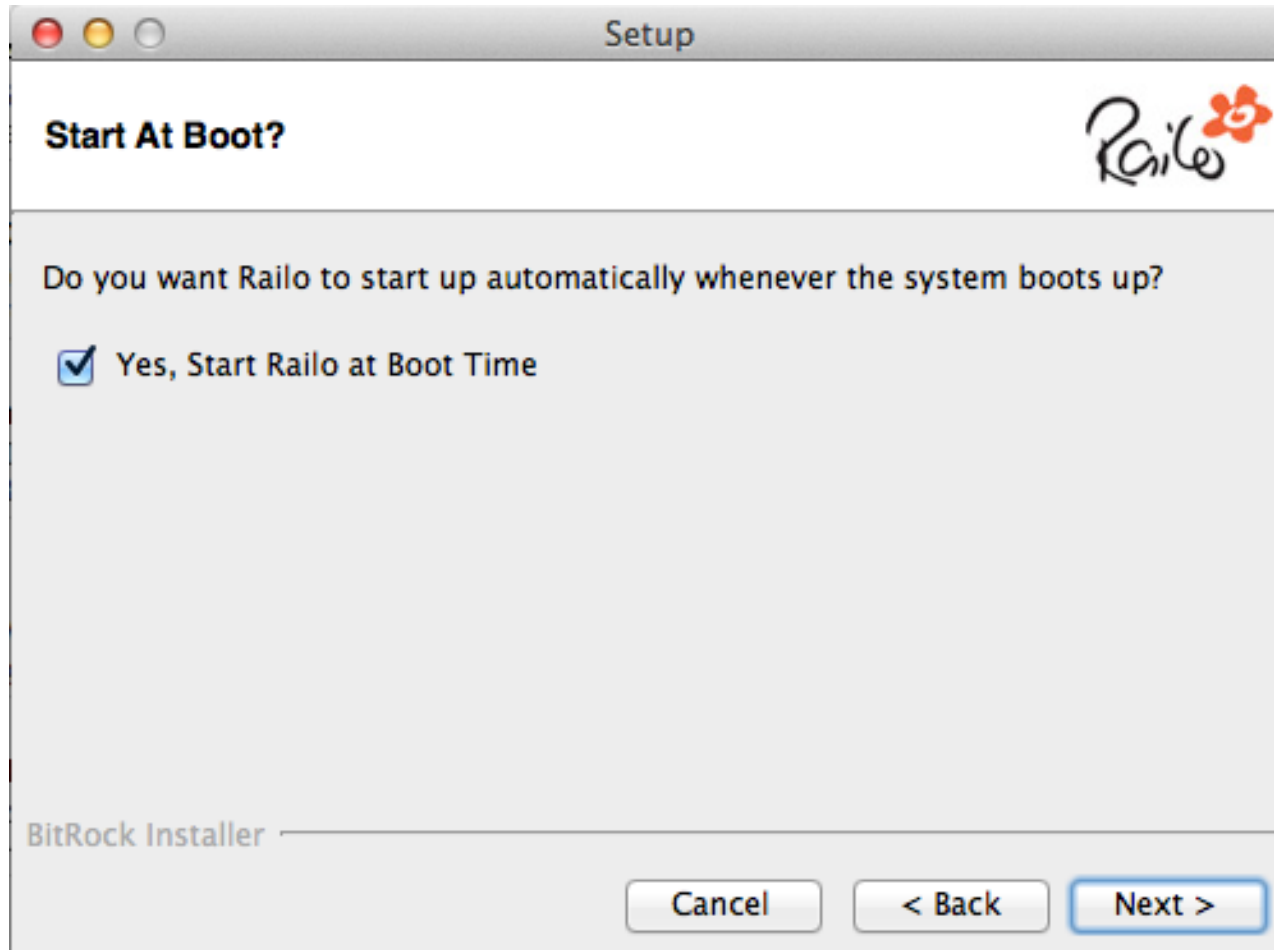

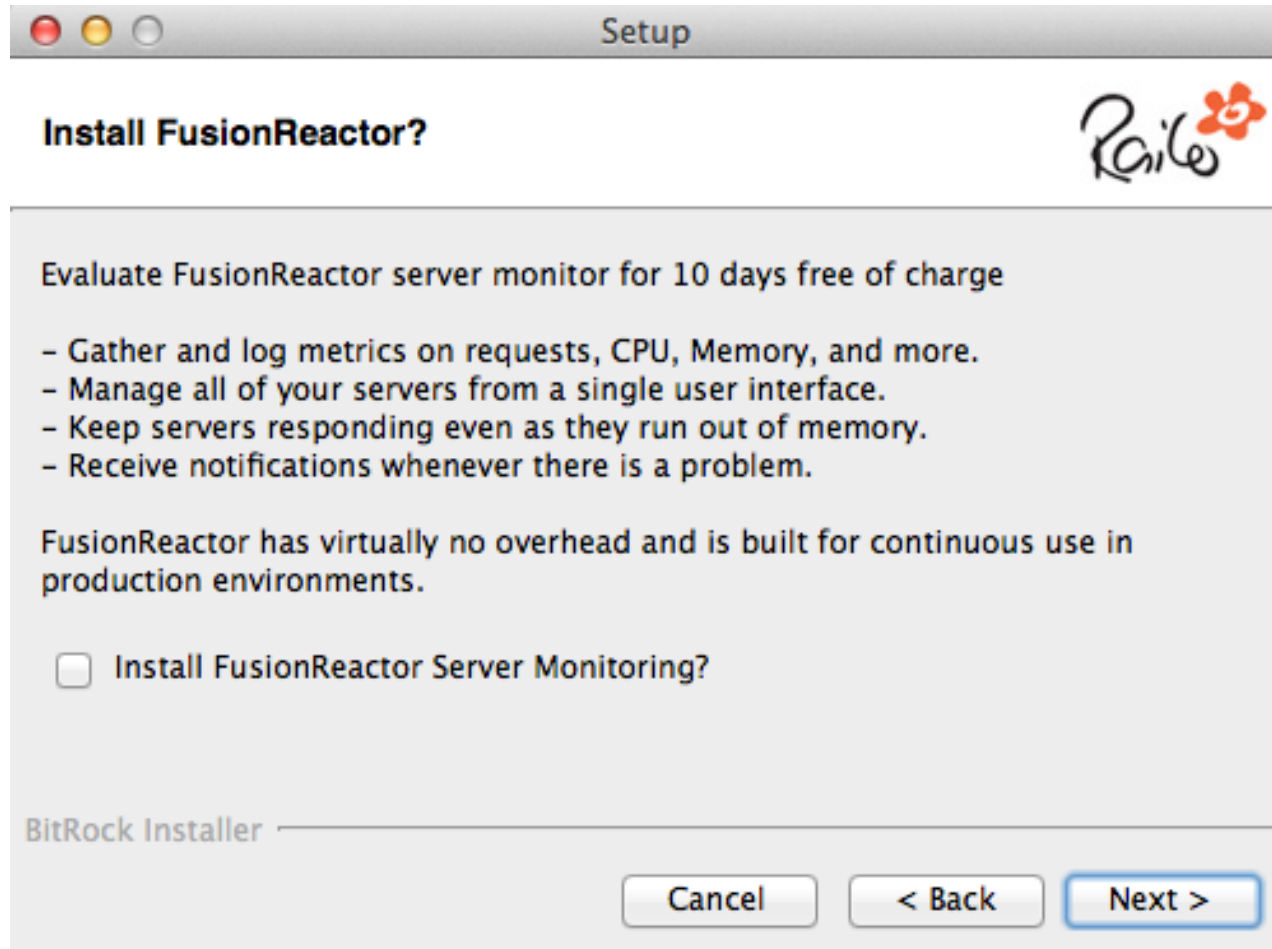

What port number do you want Tomcat to listen to? This will be the port that you will use to access both Tomcat's Web Administrator and Railo's Server Administrator. If you're not sure what this is, just leave it set to it's default value.

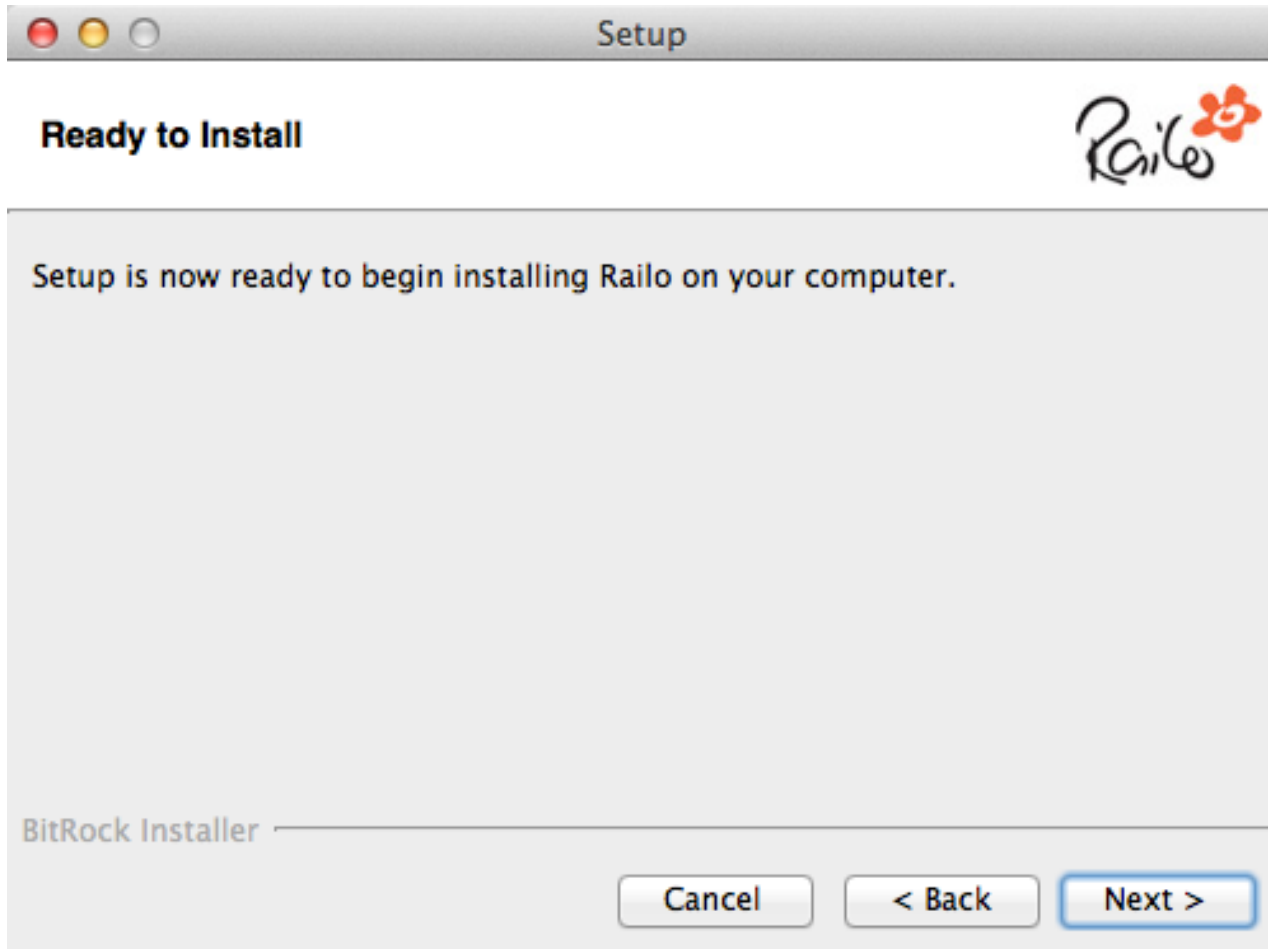

Tomcat Port

Overview

[★ Favorites](#) [Log out](#)

The Server Administrator allows you to install updates and patches for your Railo installation and to restart the engine with a mouse click. You can preconfigure new web contexts and define restrictions and configurations per web context individually.

General Info

Version	Railo 4.0.4.001 final
Version Name	Appollo
Release date	Mar 6, 2013
ColdFusion® compatibility version	10.0.0.0

Configuration File	/www/_servers/railo/lib/railo-server/context/railo-server.xml
OS	Mac OS X (10.8.5) 64bit
Remote IP	0:0:0:0:0:0:1%0
Host Name	localhost
Servlet Container	Apache Tomcat/7.0.33
Railo Server ID	63db00d6f99bcaaf784ed18cddc1d81f
Java	1.6.0_65 (Apple Inc.) 64bit
Architecture	64bit
Classpath	<code>/www/_servers/railo/tomcat/bin/bootsrap.jar</code> <code>/www/_servers/railo/tomcat/bin/tomcat-juli.jar</code>

Update Info

Core

A patch (4.1.2.005) is available for your current version (4.0.4.001).

Extensions

You have no extensions installed yet.

Memory Usage

Heap

The JVM (Java Virtual Machine) has a heap that is the runtime data area from which memory for all objects are allocated.

Non-Heap

Also, the JVM has memory other than the heap, referred to as non-heap memory. It stores all cfc/cfm templates, java classes, interned Strings and meta-data.

Support

Professional Support

For many organizations and individuals, the security of a formal paid support contract is a necessity and we're pleased to offer four standard packages as well as the flexibility to

Railo 4.0

You are now successfully running Railo 4.0.
Please check the Railo Server Administrator for available updates and patches.

Important Notes

Thank you for choosing Railo as your CFML engine. If you have installed Railo on a public server, please be sure to secure the Server and Web Administrators with strong passwords and whatever means you deem necessary.

If you are new to Railo, please check the [Getting Started](#) guide on our page on how to begin. In our Wiki you will find a lot of useful information and documentation.

If you want to start running some code in this Railo instance, simply place it in the website's folder at:

```
/www/_servers/railo/tomcat/webapps/ROOT/
```
